

May 10, 2004

Dear EAA Chapter President:

EAA, the Experimental Aircraft Association, is proud to join with the Learning for Life Aviation Exploring program in their promotion of aviation, particularly aviation careers to both young men and women who are 14 (and have completed the eighth grade) or 15 to 20 years old.

If you have an interest in establishing a Local Exploring Post, adult volunteers and professional staff will provide the names of interested students, guidelines for program planning, and Explorer Leader Basic Training. As an EAA member, we encourage you to volunteer your time and knowledge with the Aviation Explorers as they investigate various aviation career fields. Your participation will help to enrich the program.

For more information, please visit the Aviation Exploring web site at www.aviationexploring.org. The Exploring program promotes career education through these five areas of emphasis: career opportunities, life skills, leadership experience, character education and service learning activities. Together, we can enrich the lives of America's youth.

Sincerely,

Experimental Aircraft Association
