

Women *in* Aviation

I N T E R N A T I O N A L

Dear WAI Member:

Women in Aviation, International is proud to join with the Learning for Life Aviation Exploring program in their promotion of aviation, particularly aviation careers to both young women and men age 14 (who have completed the eighth grade) through 20 years of age.

As a woman in aviation, WAI encourages you to volunteer your time and knowledge with the aviation Explorers as they investigate various aviation career fields. Your participation will help to enrich the program.

The Exploring program promotes building character through career opportunities, life skills, leadership experience, character education, and service learning activities. Together we can enrich the lives of America's youth.

Sincerely,

Dr. Peggy Chabrian
President
